## Skills

Java, Spring Boot, Spring MVC, IOC, AOP, Spring JDBC, Hibernate, REST APIs, Microservices, Kafka, Auth0, API Integration, Azure Event Hub, Distributed Systems, PostgreSQL, MySQL, MongoDB, SQL, Redis, Database Management, Query Optimization, Performance Tuning, AWS, Azure, Azure CLI, Docker, Kubernetes, GitHub Actions, CI/CD Pipelines, Maven, JMeter, Postman, Git, GitHub, Jira, Node.js, Python, JavaScript, JSON, JUnit, Mockito, System Design Thinking, CI/CD, Spring Batch, Unix, JIRA, Confluence, Grafana, Kibana.

## Work Experience

### Gpu.net, Bangalore

June 2025 - Present

#### Software Development Engineer I (SDE I)

- Architected a fan-out, event-driven feed system using microservices and asynchronous messaging (Kafka-style pub/sub), reducing feed latency and increasing engagement by 21
- Designed and implemented RESTful APIs using Spring Boot with proper validation, authentication, and rate limiting, handling high-concurrency traffic.
- Optimized PostgreSQL queries with indexing and query tuning, and introduced Redis caching to reduce DB load and improve response time by 40
- Led the end-to-end development of the Flutter application, integrating Astra (AI model/agent marketplace) and the Gvex trading platform with buy/sell functionality — project currently in pre-release phase.

### Google Summer Of Code (GSoC)

May 2025 - Present

#### Mentor FOSSASIA

- Mentored international contributors in the BadgeMagic open-source project, guiding them through feature development and code reviews, which enhanced project stability and adoption.
- Collaborated with the FOSSASIA core team to plan development milestones, ensuring successful project completion within the GSoC timeline.

### Infinisync Consulting, Delhi

May 2024 - May 2025

#### Software Development Engineer I (SDE I)

- Led the end-to-end development of a backend system to automate lead generation and appointment scheduling, cutting manual operations by 60%
- Implemented event-driven communication using Apache Kafka to enable asynchronous processing and decoupled service interactions.
- Built a real-time audio streaming pipeline using Kafka to stream AI-generated audio in chunks, orchestrating synchronization with avatar lip-sync services.

### Google Summer Of Code (GSoC)

June 2024 - Nov 2025

#### Mentee FOSSASIA

- Selected as a GSoC mentee under the FOSSASIA community to develop the BadgeMagic Flutter app, contributing to a project with 1.9K+ GitHub stars.
- Implemented cross-platform functionality for iOS, Android, ensuring consistent performance and contributing to 3K+ Play Store downloads.

## Project Work

- **Badge Magic** Developed a cross-platform Flutter app for designing and animating LED badge displays with real-time Bluetooth flashing, optimizing rendering performance and stability across Android and iOS.
- **MQUEL - Freelance** Built a Flutter + Spring Boot microservices application to ingest and process Excel datasets, implementing a rule-based lead classification pipeline with scoring algorithms to automate segmentation and reduce manual triage.

## Education

### KIET Group Of Institutions

Nov 2021 - Jun 2025

BTech. in Computer Science and Engineering

**CGPA: 8.3/10**

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, Advance Data Structures and Algorithms
